

Are you ready to be part of the rapidly growing field of healthcare simulation? The future of healthcare is changing, and so are the careers within it. Join us this fall for the undergraduate course in Simulation Operations at the University of South Florida!

Why Healthcare Simulation?

The global market for healthcare and medical simulation is projected to reach a staggering [\\$17.4 billion](#) by 2030. As healthcare evolves, so does the need for skilled professionals who can drive innovation, improve patient care, and save lives through simulation training. With the increasing demand for simulation operations specialists, now is the perfect time to embark on a career in this exciting and rewarding field.

At USF, we believe in equipping our students with the knowledge and skills necessary to thrive in the healthcare industry.

What sets our program apart?

1. *Pioneering Curriculum:* Our Simulation Operations course will kickstart your journey, providing you with insights into simulation concepts, modalities and immersive environments, technology and equipment, and more. You'll gain hands-on experience with state-of-the-art simulation equipment and software, preparing you for real-world scenarios.

2. *Expert Faculty:* Learn from experienced faculty members who are at the forefront of healthcare simulation research and practice. They will guide you through immersive learning experiences, ensuring you develop the skills necessary to excel in this dynamic field.

3. *Career Opportunities:* As a graduate of University of South Florida with a specialization in Healthcare Simulation, you'll be in high demand. Whether you choose to work in hospitals, medical education institutions, government agencies, or private industries, you'll play a crucial role in advancing patient safety and improving healthcare outcomes.

Join us on the forefront of healthcare innovation:

If you are passionate about healthcare, technology, and making a difference, we invite you to join us on this incredible journey. Enroll in the first course, ***HSC 4933: Simulation Operations***, this fall, and be part of shaping the future of healthcare simulation.

To learn more about the Simulation Operations course and the admission process, please reach out to the CPH advising team at UG-COPHadvise@usf.edu. This course has limited enrollment and is available to Health Sciences and Public Health majors at USF.

Don't miss out on this unique opportunity to be at the forefront of the rapidly evolving healthcare industry. Secure your spot today and make a lasting impact on the future of patient care.
